SUMMARY

Full-stack engineer with a professional track record spanning enterprise financial systems to modern AI-native auth infrastructure. Started in financial applications support at a private markets asset manager in Singapore, then built authentication infrastructure and developer tooling at an early-stage startup, contributing to 10+ companies entering active product evaluation. Co-founded a venture-backed startup that secured \$100,000 in funding and shipped a working MVP. Comfortable working across enterprise systems, auth infrastructure, and full-stack product work in both structured and fast-moving environments.

PROFESSIONAL EXPERIENCE

SCALEKIT

Software Engineer

San Francisco, CA
Oct 2025 – May 2026

- Architected and shipped MCP authentication servers in TypeScript and Python, establishing secure AI agent access patterns across the customer base, allowing 10+ startups to adopt in active production evaluation when I left.
- Owned end-to-end reference implementations for SSO, SCIM directory sync, and OAuth 2.0 flows across six stacks including Go, Django, Node.js, and React Native, serving as the integration blueprint for enterprise deployments.
- Extended an internal Claude Code automation script to handle additional OAuth authentication types, cutting the time to build a new external app connector from one sprint to roughly one day for a team of three engineers.
- Contributed to a developer documentation rebuild using Astro/Starlight, incorporating direct customer feedback to reduce friction in the self-serve onboarding experience.

TALGANIZE SOLUTIONS

Full Stack Engineer

Boulder, CO
May 2025 – Oct 2025

- Designed and implemented Microsoft OAuth 2.0 authentication end to end, handling token validation, session management, and secure user provisioning across a distributed frontend and backend.
- Built an automated job aggregation pipeline using Python and Selenium, centralizing postings from major financial institutions and tech companies into a single queryable platform.
- Developed an AI-powered resume parsing system using spaCy and custom NLP logic to extract candidate skills and match them to job requirements, one of three core pipelines delivered during the engagement.
- Set up end-to-end CI/CD pipeline with Jest, GitHub Actions, and automated vulnerability scanning to establish production quality standards before public launch.

FOODWISE SOLUTIONS INC.

CTO and Co-Founder

Boulder, CO
Apr 2024 – May 2025

- Won first place at the CU Boulder New Venture Challenge, securing \$100,000 in funding by presenting the technical architecture and business case to a panel of judges and investors.
- Led a 4-person team through the full build cycle from concept to working MVP, making the core architectural decisions for a demand forecasting platform that aggregated sales history, weather data, and calendar events to predict restaurant prep volumes.
- Managed the technical roadmap and engineering priorities across the full lifecycle of the company from incorporation through dissolution in May 2025.

PARTNERS GROUP SINGAPORE

Junior Application Specialist

Singapore, SG
Oct 2021 – July 2022

- Maintained and enhanced financial applications for a large private markets asset manager using SQL and ServiceNow, supporting business-critical systems in a regulated environment
- Built SQL automation scripts for internal audit processes, reducing manual audit time significantly
- Developed performance analytics dashboards using ServiceNow and QlikView, giving management visibility into team and ticket resolution metrics

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, Java, R

Auth & Identity: OAuth 2.0, SSO, SCIM, Multi-tenant auth, Token validation, RBAC

AI/ML: Google ADK, MCP, FastMCP, LangChain, IBM Watson, spaCy

Frameworks/Libraries: React.js, Node.js, Angular2, Tailwind CSS, Jest

Data & Analytics: MySQL, PostgreSQL, NoSQL, Tableau, QlikView, Pandas

Cloud & Tools: Google Cloud Platform, Docker, GitHub, Firebase, GitHub Actions, Selenium, JIRA

EDUCATION

UNIVERSITY OF COLORADO BOULDER

Bachelor of Science in Computer Science, Minor in Business and Leadership Studies

Boulder, CO
Aug 2022 – Dec 2024
